# SEPCOM™ FARM

## Solids-Liquid Separators for Cattle Manure

**MULTIPLE PATENTS PENDING**

Solids-liquid separation of cattle manure is the answer to the urgent problem of nitrate and phosphate recovery.

Re-using slurry offers enormous advantages in terms of transportation, storage, cleanliness and energy savings.

## LIQUID PHASE

- Easy to spread, mix and pump
- Minimum sedimentation residue or material deposits
- Can be used for flushing
- Ideal for fertigation
- Reduced odours
- Less put-aways

Flushing

Fertigation

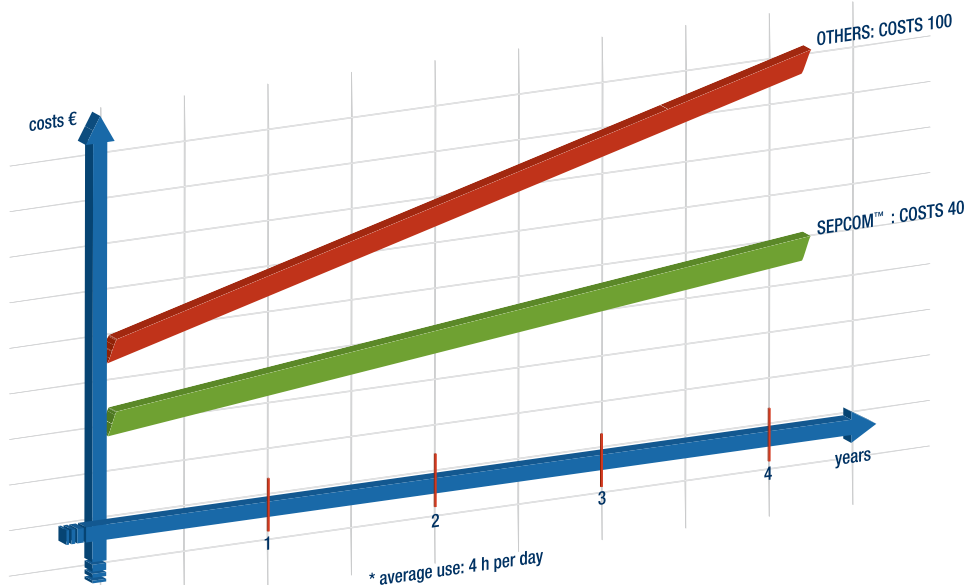

## SOLID PHASE

- Odourless, easy to shovel, store and convey
- Excellent as soil fertilizer
- Product can be marketed
- Self-composting product
- Can be used as bedding (only for SEPCOM™ BEDDING machine)

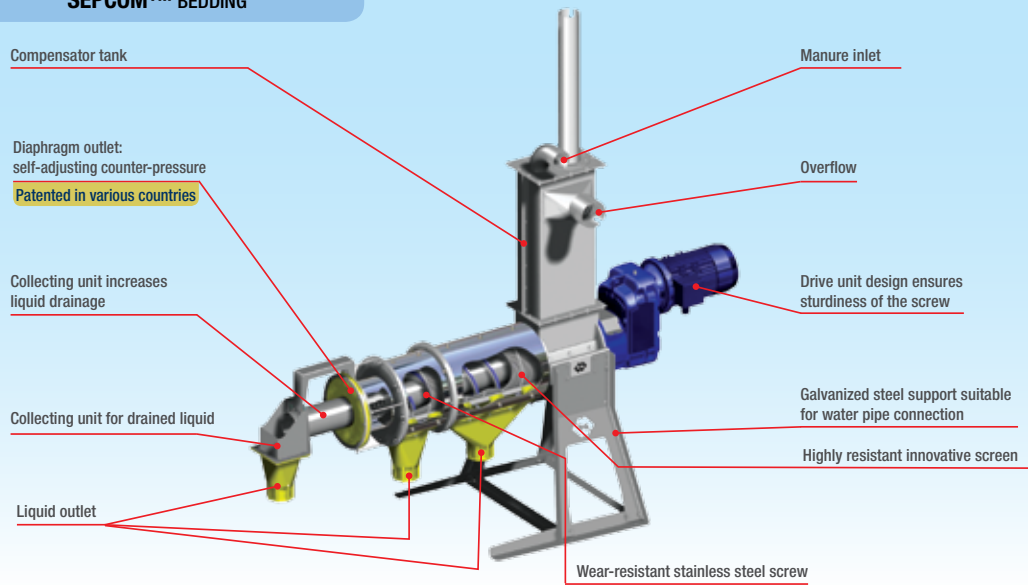

Specially formulated for this specific type of manure,  
SEPCOM™ is simple, reliable, efficient and economical

## MANAGEMENT COST COMPARISON: SEPCOM™ vs TRADITIONAL SEPARATORS in 5 years\*
