Bin Activators

BA

Bin Activators

SOLIDS DISCHARGING EQUIPMENT

The BA Bin Activator is a discharging device which, thanks to controlled vibration, ensures continuous down-flow of the material from silos and hoppers.

Using this device ensures product extraction with optimum “Mass Flow”.

- Ensures uniform descent of the product (MASS FLOW) inside the silo
- Avoids bridging in the discharge cone
- Prevents “ratholing” and segregation of the material to be discharged
- Stops dangerous flushing
- Prevents economic loss due to plant downtimes

- Turned cone constructed using industrial techniques
- Seamless discharging cone
- High flowability
- Maximum resistance to stress
- Available with food-grade painting and in 304L SS

- Suspensions pivoting at 360°
- Maximum efficiency
- Minimum vibration energy consumption
- Minimum vibrations transmitted to silo

- Electric vibrator with adjustable masses, ATEX certified for zone 21

OPTIONS & ACCESSORIES

GASKET WITH MAXIMUM RELIABILITY:

- Seamless one-piece without joints for maximum resistance to stress
- Double flange for perfect fixing and optimum sealing
- Construction in wear-resistant SINT® food-grade engineering polymer
- Design studied to prevent stagnation, ideal for food and perishable products

* The validity of the warranty is conditioned by strict respect of the conditions of use described in the Installation, Use & Maintenance Manual.

APPLICATIONS

- Food
- Flour milling
- Animal feed milling
- Plastics
- Chemicals
- Pharmaceuticals
- Glass
- Fertilizers
- Waste water treatment
- Foundries
- Premixed adhesives for ceramics industry
