

LBC Low Profile Circular Lump Breaker from WAM

The new WAM LBC Circular Lump Breaker is a low-profile cost-effective solution to clumps and lumps in powders and granular materials.

The fast rotation of the special cutting knives through a rigid grid provides efficient crumbling of the lumps and clumps.

- Lump Breaker body manufactured in Aluminium Alloy and available with Stainless Steel or Mild Steel Blades.
- Available in multiple diameters including 200, 250, 300, 350 and 400mm.
- 75mm Flange to Flange (Low Profile).
- Comes with Gearbox and Motor.
