

Green bag filter to Silotop dust collector change over

Filquip can assist with the planning of upgrading your older style Green Filter bags to modern reverse pulse self cleaning Silotop Zero units.

Change over process:

- 1) Remove green bag and inner.
- 2) Cut holding frame off silo
- 3) Grind clean existing upstand lip and straighten if needed.
- 4) Weld in conversion plate to Silotop (Available from Filquip).
- 5) Bolt Silotop onto flanged conversion plate.
- 6) Connect power (multi-voltage) and 12mm compressed air line item Silotop.

The Silotop Zero is a high efficiency self cleaning dust collector with high performance media.

- Dust emissions less than 1mg/Nm³.
- Simple to use with gas strut lid for access
- 1.1m access height for easy maintenance operations

Filquip also supplies:

- Silo high level kits
- Silo pressure relief valves
- Silo fill line valves
- Silo overfill protection panels
